

Aquaforest Searchlight

Making SharePoint Content Findable

Aquaforest's Findability Solutions for SharePoint and Office 365 dramatically improve search success by ensuring that Site Collections are fully text searchable and Metadata is automatically added to documents.

Automated Metadata and OCR for Findability

SHAREPOINT AUDIT RESULTS

FILE SEARCHABILITY

Studies have shown that in many organizations 20% of documents are not fully text searchable. Searchlight audits SharePoint content and automatically OCRs Image PDFs and other image files where needed so the content can be fully indexed by SharePoint and Office365.

Automated Metadata Generation

To further enhance findability, metadata can be automatically generated based on document content via rules, taxonomies, barcodes, PDF forms, XMP and integration with NLP services.

<p>Taxonomies</p> 	<p>Searchlight supports the use of managed metadata and taxonomies for both identifying taxonomy values that should be used to tag the document and is also able to add new taxonomy values if required.</p>
<p>Entity Extraction</p> 	<p>By integrating with NLP (Natural Language Processing) services, Searchlight is able to assign values for Entities such as Location, Person, Company and more.</p>
<p>Barcode Values</p> 	<p>Over 20 types of barcode can be recognized and the values assigned to Library metadata columns.</p>
<p>PDF Forms</p> 	<p>Data from PDF forms can be extracted and each field value assigned to a separate metadata column.</p>
<p>Rules</p> 	<p>Text and Zonal rules-based methods are provided to identify codes or other key values for metadata.</p>
<p>Taxonomies</p> 	<p>Searchlight supports the use of managed metadata and taxonomies for both identifying taxonomy values that should be used to tag the document and is also able to add new taxonomy values if required.</p>
<p>Document Metadata</p> 	<p>Both standard and custom PDF metadata can be extracted and assigned to SharePoint columns. This can also include XMP metadata.</p>

Aquaforest is based in the UK and has been providing solutions to a world-wide market since 2001 with over 2,000 customers in 50 countries.
