Aquaforest Searchlight

Ensure SharePoint Site Collections are Fully Text Searchable with Automated OCR

SharePoint   Office 365   Microsoft Azure

Aquaforest Searchlight

The SharePoint Business Problem : Documents that cannot be found

Studies have shown that in most organizations over 20% of documents may not be fully text searchable so will not be located by text search or discovery exercises.

THE CAUSE

Image PDFs, Images and Faxes will not be indexed so are not text searchable by SharePoint. Most users do not have any way of identifying such files

THE BUSINESS RISKS

Failing to locate document for business critical searches, privacy law compliance or legal discovery exercises.

THE SOLUTION

Aquaforest Searchlight monitors SharePoint site collections and ensures that all image files are made fully text searchable.

The Solution : Aquaforest Searchlight

Aquaforest Searchlight monitors SharePoint site collections to ensure that all Image PDFs are made fully searchable. The product is architected to manage documents in both SharePoint Online / Office 365 and On-Premises versions 2010, 2013 and 2016.
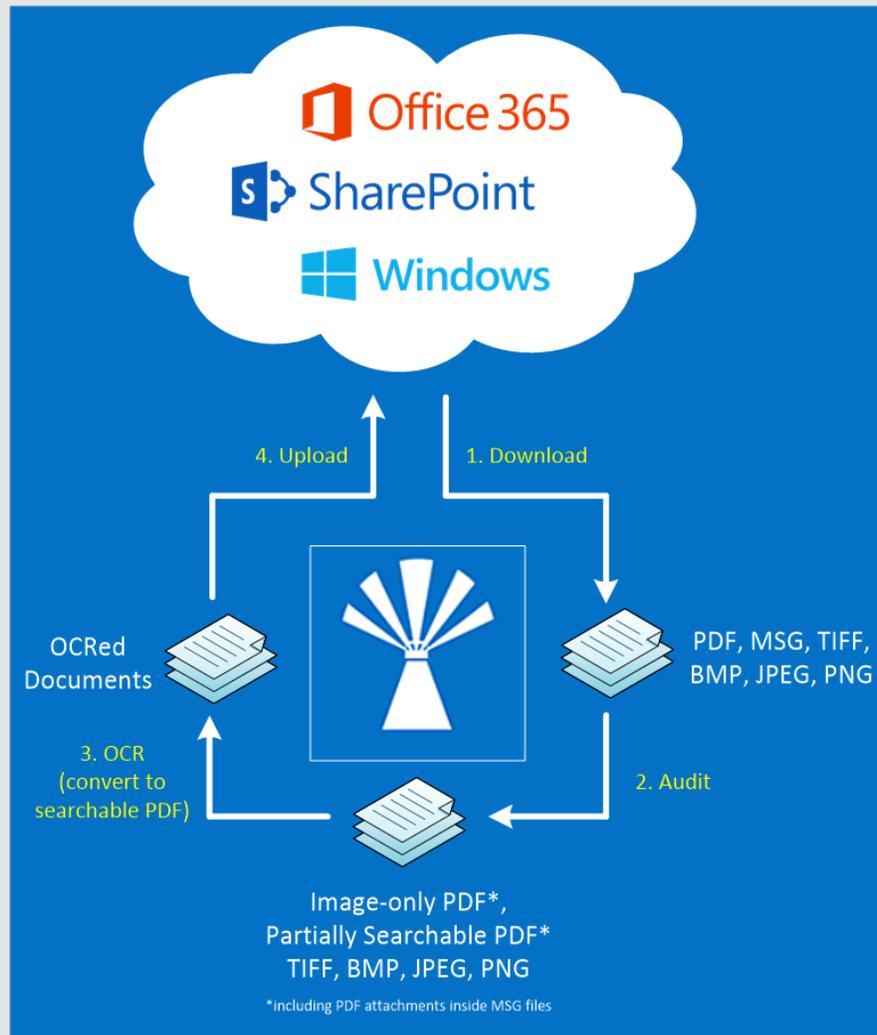

STANDALONE
Aquaforest Searchlight is installed on a machine of your choice separately from the SharePoint server

LOCAL OR AZURE INSTALLATION
For SharePoint Online or Office 365 you can choose between installing Aquaforest Searchlight on your own local servers or on an Azure instance.

MIGRATIONS
Support for Windows file systems as well as SharePoint means that documents can be pre-processed before uploading in large migrations.

Additional Benefits of Text Searchable PDFs

Aquaforest Searchlight will ensure that all Image PDFs are automatically The most obvious benefit of this is that the SharePoint indexer will be able to fully index the files for text search but there are also other benefits.
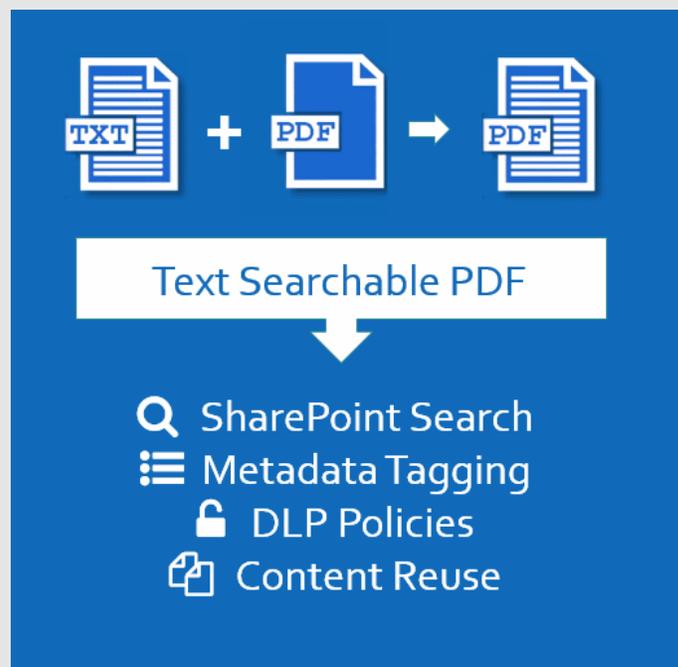

PRIVACY & DLP

The automated Data Loss Prevention facilities within SharePoint 2016 and Office 365 need text to be able to identify personal information such as credit card numbers, social security numbers or other PII.

CONTENT REUSE

Users will be able to reuse content from the searchable PDFs as they can select and copy the new generated text layer.

METADATA TAGGING

Use of automated metadata tagging tools require text to identify relevant metadata which Aquaforest Searchlight ensures.

TXT + PDF → PDF
